## Reference Letter

The letter is to confirm that the Securitum company has delivered for our staff a training „Certified Ethical Hacker” (authorized training based on the EC-Council license).

The 5 days training took the form of practical exercises and was conducted remotely. Training participants appreciated such aspect of the course as: large number of practical components, interesting examples based on the practice of the coach, professional training materials, good organization as well as opportunities of active discussion during the training.

We wish you to thank for the professional conduct of this training, at the same time strongly recommending participation in workshops on IT security organized by Securitum.
