REFERENCE LETTER

I do confirm **Securitum** company has conducted for us 2 all-day training sessions covering the basics of IT security and it was intended for the global Security Operation Center established within GFT. The trainings took place in June 2021 and have been adjusted to our custom needs, to cover threat landscape, popular techniques and tooling used for cracking and basic terms and security concepts.

We deeply appreciate the professional knowledge on cyber security and threat landscape provided by the Securitum trainers and the straightforward materials and demo cases. Thus without any hesitation we are happy to recommend Securitum company for conducting technical and awareness trainings in the area of IT security.

Yours Faithfully,

Przemysław Kulesza
Head of SOC, GFT Technologies
